myUTN-80 Dongleserver

The Dongleserver myUTN-80 allows up to eight USB dongles to be used by many users over the network or internet — simply and safely from a central location. With the corresponding Rack Mount Kit, the dongle server and the connected dongles can be placed in a secure server room and comfortably managed through a web interface independent of location.

Users are independent of the USB interface and therefore do not need to plug in their dongles into their computer locally. Valuable software licensed dongles (CAD & RIP Software, DATEV, Aladdin HASP, AVID and Cubase among many others) are placed in the locked dongle server and therefore safe from theft, loss and damage.

Ideal for VMware, Citrix XEN oder Microsoft Hyper-V!

Regular price

myUTN-80 and RMK = 658,- € (HEK)

Special price

myUTN-80 and RMK = 596,- € (HEK)

Benefits at a glance:

- Dongles are protected from theft, loss and damage
- For Mac, Windows and virtualized environments
- Each dongle can be assigned to particular users or departments
- Encrypted USB Communication
- Multihost enabled
- VLAN enabled
- Including a Rack Mount Kit for secure storage in server room
- Free updates and support
- Up to five years warranty
