

Overview SEH Products for ThinPrint Environments:

ThinPrint Gateway TPG-25	for up to 2 printers	Order Numbers: M03870 (EU), M03871 (UK), M03872 (US), M03873 (JP), M03874 (AUS)
ThinPrint Gateway TPG-65	for up to 6 printers	Order Numbers: M03880 (EU), M03881 (UK), M03882 (US), M03883 (JP), M03884 (AUS)
ThinPrint Reader TPR-10 TPR-10 Starter Pack	Personal Printing	Order Numbers: M03810 (EU), M03811 (UK), M03812 (US), M03813 (JP), M03814 (AUS)

Special Printing Solutions with Integrated ThinPrint Gateway:

Intelligent Spooling Device ISD300	for up to 50 printers	Order Numbers: M03710 (EU), M03711 (UK), M03712 (US)
Intelligent Spooling Device ISD400	for up to 150 printers	Order Number: M03770
Intelligent Spooling Device ISD410	for up to 150 printers	Order Number: M03780 (RAID)

For more information about the Intelligent Spooling Devices please go to

SEH Hardware Solutions for ThinPrint Environments and Personal Printing

**ThinPrint Gateways
ThinPrint Reader
TPR-10 Starter Pack**

ThinPrint Gateways TPG-25 and TPG-65

Based on the proven ThinPrint technology there is already the second generation of ThinPrint Gateways on the market. The TPG-25 connects up to two network printers for bandwidth optimized printing, the TPG-65 attaches up to six printers.

Regardless of printer manufacturers and network environment, the ThinPrint Gateways are the perfect solution for all ThinPrint installations.

With the integrated ThinPrint client and additional features such as backup parameters and print job buffering, TPG-25 and TPG-65 also save more money: maintenance, safe and energy saving are just some of the properties that the ThinPrint Gateways offer in this context.

Of course they also support ThinPrint AutoConnect and ThinPrint Connection Services and more!

If customers want to include more than six printers in a ThinPrint environment, SEH also offers scalable solutions for as many printers as required. All SEH print servers and the dedicated Print Spool Appliances from the Intelligent Spooling Device range offer an integrated ThinPrint client.

ThinPrint Gateways Features

- Optimized bandwidth utilization and decompression of print jobs, ensuring application performance and reducing data transfer time
- Additional features, such as backup parameters and print job buffering
- Low costs per printer (TCO)
- Easy configuration, administration, and management via TPG Control Center or SEH InterCon NetTool
- Quick and easy installation with ThinPrint AutoConnect and ThinPrint Connection Services

Personal Printing with Contactless RFID Card Technology

Especially for Personal Printing SEH and Cortado offer the ThinPrint Reader TPR-10. Based on the contactless RFID card technology, print jobs are initiated with only a swipe of a card on the TPR-10.

The ThinPrintReader is printer manufacturer-independent and can be installed transparently between the printer and the network. This type of integration does not interfere with existing infrastructure, such as output monitoring systems.

Also, the ThinPrint Reader has an integrated ThinPrint Client as well as additional features such as backup parameters and print job buffering.

The contactless RFID technology supports a range of smart cards (e.g. MIFARE, FeliCa, etc.) and their standards (e.g. ISO 14443). Smart cards already in use in the enterprise, for time registration and/or access systems, can be used for Personal Printing with the ThinPrint Reader. The TPR-10 comes with five matching RFID smart cards. Additional RFID smart cards and optional RFID tags are also available.

ThinPrint Reader TPR-10 Features

- Contactless card technology
- TPR-10 does not interfere with existing network infrastructure, such as output or monitoring systems, because it is independently connected to the printer
- TPR-10 is manufacturer-independent, i.e., every network printer can become a Personal Printer
- Independent of the operating system used
- Existing company Smart-Cards (e.g., for time registration and/or access systems) can be used for Personal Printing with the TPR-10
- Comprehensive security package: Encryption, Port-Blocking, IP-Sender-Protection, etc.

TPR-10 Starter Pack Exclusively for New Cortado Customers

After registering for the guarantee extension, new Cortado customers receive a free user-based Personal Printing Annual License for five users!

Content TPR-10 Starter Pack:

- 1 x ThinPrint Reader TPR-10
- 5 x RFID Smart Cards
- 1 x Free user-based Personal Printing Annual License for 5 users*
- 3 years guarantee on hardware, extendable to 5 years**

For more information about the TPR-10 Starter Pack visit www.seh-technology.com/starter-pack.html

*Offer of free user-based Personal Printing Annual License for 5 users is limited to new customers, who have not yet purchased Personal Printing licenses. The period of licensing is 12 months, after that license fees are due. More information about licensing is available at www.cortado.com.

** Free hardware guarantee extension from 3 to 5 years after registration with SEH
