

## Internal Print Server for Epson Printers With Type B Port

In close cooperation with Epson, SEH develops interface cards attaching Epson printers and multifunctional peripherals (MFPs) to the network since 1997. The Ethernet print server PS107 is the only IPv6-enabled interface card for Epson printers and MFPs with Type B port worldwide. This model features the latest security standards and many value-added extras!

- *Only IPv6-enabled interface card worldwide to attach Epson printers with Type B port*
- *For Ethernet and Fast Ethernet (10BaseT/100BaseTX)*
- *PS107 is perfectly adapted to Epson printers and administration tools: EpsonNet Management Tools, Direct Print, Internet Print, Status Monitor 2 and 3 etc.*

### Benefits

- Fast and Simple Installation and Configuration
- User-friendly Management
- High Security: Encrypted Printing with TLS/SSL, Authentication, Access Control and Much More!
- For All Operating Systems Including Windows, Mac OS, Linux
- Support of all Important Protocols, IPv6-enabled
- ThinPrint .print Client for Bandwidth Optimization and Control (e.g. Server-based Computing, Desktop Virtualization, Network Infrastructures Strained by Frequent and Large Print Jobs)
- Regular Software Updates and Worldwide Support
- Up to 5 years Warranty
- And Much More!

### Tested and Recommended by Epson! PS1103 Gigabit Print Server for all Epson Printers!

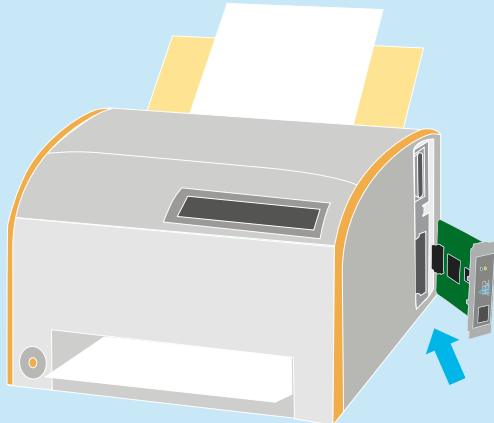

Gigabit

Gigabit print server for all Ethernet networks (Standard, Fast, and Gigabit) with three USB 2.0 High Speed Ports and the same benefits as PS107!

**Installation – fast and simple**

- Simply slip the print server into the Type B slot, fix it with a screw – done!
- With Printer Wizard (installation assistant) for installation with just a few mouse clicks!

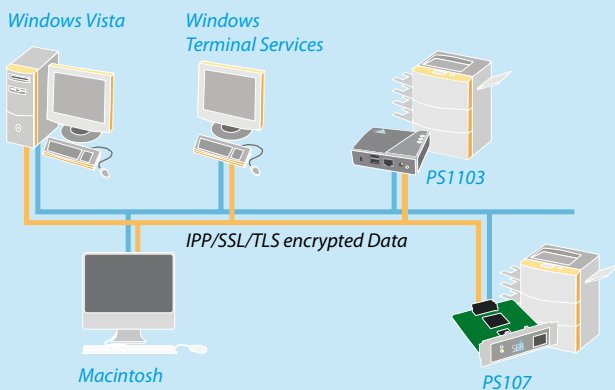

**Configuration and Management – user-friendly**

It is your choice: Many management options simplify configuring and managing our print servers. You can use the browser, the Epson tools (EpsonNet Management, Direct Print, Internet Print, Status Monitor 2 and 3, etc.) or the practical SEH InterCon-NetTool. In all network types and for all operating systems!

**SEH – definitely secure!**

You will not find a more comprehensive security package than what comes with our print servers: You can encrypt your print data, secure the configuration, control access to the printer, authenticate safely via a host of secure authentication methods and much more! In all network types and for all operating systems!

**Supported Languages**

English, German, French, Spanish, Italian, Portuguese, Japanese, Korean, Chinese (traditional and simplified)

**With ThinPrint .print Client Including ThinPrint SSL Support for**

- Server-based computing environments (Citrix, Windows Terminal Services etc.)
- Desktop virtualization (Citrix XenApp, VMWare etc.)
- Traditional network printing environments with high and voluminous output requiring bandwidth optimization and control

*Please take a look at our broad portfolio of external print servers, too! All models are compatible with Epson output devices and ideal for mixed printer pools: multi-port print servers, USB print servers with UTN for accessing GDI printers and non-network-enabled MFPs, pocket print servers, and many more!*
