# FIBER ADAPTER FOR HP LASERJET MODELS HPFA-226 (100BASE FX) / HPFA-1226 (1000BASE SX)

## PRINTING IN A SECURE FIBER-OPTIC NETWORK - THE ONLY INTEGRATED SOLUTION FOR HP PRINTING SYSTEMS

With the HPFA-226 and HPFA-1226 built-in adapters, you can bring Hewlett Packard printing systems into fiber optic networks in a tap-proof manner.

## How It Works

The fiber adapters were developed and optimized in close cooperation with HP exclusively for the LaserJet Enterprise models.

The HPFA-226 and HPFA-1226 products are permanently installed with the respective HP device so that there are no open connections to the outside and thus, on the one hand, any possibility of modifying the network connection to the HP printing system is prevented and, on the other hand, any possible eavesdropping of data is ruled out. This ensures that the security of the fiber optic network is maintained right through to the end point.

The products have no influence on the functionality of the respective HP printing system and the printing environment. Everything remains transparent for both the application and the administration level.

Bring your HP printing system to the fiber optic network as easily and securely as this:

Once installed, you don't have to worry about anything!
